

Dear Students,

AI is expected to become increasingly widespread in healthcare, leading to enhanced medical outcomes. Nevertheless, there are still obstacles to overcome, such as algorithmic bias, the requirement for substantial amounts of data, development of AI ethics, regulation, and patient safety questions. Despite these challenges AI has the potential to transform the healthcare industry.

GE HealthCare in partnership with EIT Health are extending a warm invitation to all students, phd and healthcare professionals as well to attend the **HelloAI e-learning programme** to explore the world of AI in healthcare. If you're curious about disruptive tech in healthcare - register and join for an enlightening experience.

About the HelloAI e-learning experience:

- **HelloAI Scholarship – 90% covered for RIS Countries**

EIT Health InnoStars RIS Programme offers a **scholarship** covering 90% of the tuition fee for citizens of countries with developing health innovation ecosystems ([RIS](#)), where participants should pay only 19 EUR by registration. Scholarship participants have to complete the course latest by the 31st December 2023.

- **HelloAI Certification – 7.5 ECTS credits**

Upon completion of the HelloAI programme, you'll receive a prestigious certification that showcases your expertise in AI in healthcare. This certification will enhance your profile and provide a competitive edge in the rapidly evolving healthcare landscape. Additionally, if you are registered student at a University, with ongoing studies you can earn 7.5 ECTS credits upon the successful completion of the course.

- **New 2023 edition of HelloAI programme**

These courses are specifically designed for medical professionals and students like you. Gain insights into the fundamentals of AI in healthcare and explore cutting-edge technologies that can enhance organizational processes. Examples like using ChatGPT will be discussed to demonstrate how AI can revolutionize the medical field. Learn about AI concepts tailored to the medical industry and uncover the countless benefits for both medical professionals and patients.

- **Exciting session on AI Entrepreneurship**

In addition to core AI in healthcare topics, the event will feature an exclusive session on AI Entrepreneurship. Discover how you can leverage your AI expertise and transform it into a successful entrepreneurial venture. Learn from industry pioneers who have navigated the business side of AI and gain insights into building innovative AI startups in the healthcare sector.

- **Real-life examples of AI implementation in clinical settings**

HelloAI's courses empower medical experts and students to effectively implement AI in clinical environments. Explore practical questions and learn machine-learning methods to address them. Through hands-on examples of AI implementation, you'll master customized solutions using various AI tools and methodologies. Gain confidence in scaling up AI solutions and overcome any doubts you may have.

- **Series of Live Events**

A promotional banner for the HelloAI Live Event. The background is dark blue with a grid pattern. On the right, there is a circular inset image of a doctor in a white coat and blue gloves, holding a glowing, futuristic device. The text on the banner includes the HelloAI RIS logo, the event title 'HELLOAI Live Event', the date and time 'June 22nd, 2023, 5pm (CET)', and a tagline 'The journey of AI entrepreneurship in healthcare'. Below this, it says 'Unleash the power of AI in healthcare at HelloAI's LIVE event, featuring key insights for AI entrepreneurs on development, design and approval of AI solutions & numerous transformative opportunities for medical professionals and students alike!'. At the bottom, there is a call to action 'Enrol to attend https://hvl.thinkific.com/' and a row of logos for various partners including GE HealthCare, H-HealthZ, LEITAT, Maastricht University, and others.
